

Insurance Pain Relief

ClaimControl™

1 What does it do?

ClaimControl is an on-line incident recording and analysis tool. It is used to reduce uninsured losses and to generate significant premium savings. It provides you with detailed information about claim costs, insurance risks, and health & safety exposure.

Intuitive claim entry

2 How does it work?

Real-time management information reports mean that you can instantly identify risk issues within your business, take remedial actions, and eliminate costs. By providing detailed financial information about every incident within your company, ClaimControl arms you with the accurate and up-to-date figures you need when negotiating better insurance terms.

Instant Risk Position

3 Who is it for?

ClaimControl is designed for Finance Directors, Risk Managers or Insurance Managers who want to implement or expand on self-insurance programs; cut their uninsured losses; streamline claim management; or reduce their annual insurance premiums. Company Directors are also using it to help protect against corporate liability exposure.

Powerful and flexible reporting

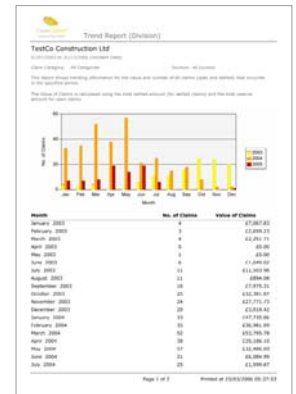

Insurance Pain Relief

ClaimControl™
